Cindy:

Liquid Environmental Services had only 1 manifest but 351 invoices for waste disposed of at the US Oil Recovery facility. As you will see from the attached sample of invoices, loads of waste material was sent to US Oil with no manifest which contained varying amounts of oil (20% - 40%) mixed with solids and water.

This is the exact evidence of how the facility operated; waste material being received with only an invoice of its acknowledgment.

If you need more samples (I have 349 more) please let me know.

Regards,
Randy
